

Hospital Access and Wellness Screening of NETS staff re:COVID-19

On arrival to NETS base at the beginning of your shift

- DO SCREENING on SINE PRO

On arrival to a hospital

- **If have done above screening, you do not need to be re-screened on arrival to a hospital.**
- CEC (Clinical Excellence Commission) and SHEOC (State Health Emergency Operations Centre) have been informed by Mary McCaskill that NETS are screened at the start of their shifts and do not need to be re-screened on arrival to a hospital. This is in line with a similar policy for Ambulance Staff.
- A situation where you may not have been screened at the start of your shift eg called to a hospital to assist a team. You will need to be screened.

HOSPITAL	ACCESS
CHW	See flow charts on COVID-19 website
SCHN	See document on website
Liverpool Hospital	Park in main ambulance bay. Entry through left-most ambulance doors (even if going to ED resus area)
Royal Hospital for Women	Use the RHW entrance <ul style="list-style-type: none"> • May need to move the sandwich board to the side in front of the doors, the first automatic doors will open • Walk forward to the internal doors which are locked, press the intercom which goes to the front desk and explain they are NETS. • The admissions staff have been informed that NETS are to be given access through the RHW main doors. No screening needed (As advised by Director of Nursing and Midwifery services, RHW Helen McCarthy 13/5/20)
Royal North Shore Hospital	Waiting for our access cards to have restrictions lifted ED: Use code as on card kept in ambulance/ EVO phone or press intercom NICU/CW: Park in usual ambulance bay under Clinical Services Building (CSB), press intercom for ward or ring NETS coordination if no-one answers Helipad: If park in ED, contact security on arrival to escort to helipad If park under CSB go to NICU and ask for security to meet you in NICU to escort to helipad.
Other hospitals	No changes
